

Advantech-DLoG Announces Partnership with ScanSource POS and Barcode in North America

Advantech-DLoG, the European market leader in Vehicle Mounted Terminals, announced today that it has expanded its relationship with ScanSource POS and Barcode, a leading global provider of technology products and solutions and sales unit of ScanSource, Inc., (NASDAQ: SCSC) to North America. This expanded relationship creates Advantech-DLoG's Distribution network within North America, offering all reseller partners access to the Vehicle Mounted Terminals and ScanSource's industry-leading logistics, technical support and services in a one-stop-shop approach.

Advantech-DLoG has always been an innovator in the development of high-quality, high-performance computing platforms and works closely with its partners. As a worldwide leader in providing trusted innovative embedded and automation product solutions, Advantech-DLoG offers a comprehensive range of high-quality, high-performance industrial computers for intralogistics and warehousing.

With pressure from deadlines, error-free stock management and high-order volumes, the challenges in logistics are growing. Reliable, fail-safe industrial computers from Advantech-DLoG ensure smooth communications and efficient processes through the entire supply chain, whether in the icy temperatures of a deep-freeze store or in strong sunlight.

The partnership with ScanSource POS and Barcode will further strengthen Advantech-DLoG's Distribution network and allow expansion into North America. ScanSource is specialized in helping resellers succeed in growing their automatic data collection, mobile solutions and point-of-sale business, with its complete selection of products from the industry's leading vendors, pre- and post-sale support, technical support, education and training and exceptional logistics.

"We are pleased to expand our relationship with Advantech-DLoG to North America," said Brenda McCurry, vice president of merchandising, ScanSource POS and Barcode, US and Canada. "Their extensive product line gives our reseller customers a robust vehicle mount offering for their end-user customers."

"In order to provide the service that our customers demand, we continue to build on a World Class network of partners established over many years. Integrators, service providers, consultancy companies, technology partners, software providers and our colleagues in local companies throughout the world support our range of services and our quality standards", said Michael Kreft, Head of Global Sales at Advantech-DLoG. "ScanSource is our newest partner in this network. They provide excellent services for vendors and resellers and we are looking forward to work with them."
